About Bihar Agricultural University, Sabour

Bihar Agricultural University (BAU), Sabour was established on 5th August, 2010, with its headquarter in the premises of Bihar Agricultural College, which is one of the five oldest Agricultural Colleges presently existing in the country and is historically known as the birth place of Agricultural Education in North Eastern India. The foundation stone of an Agricultural College at Sabour was laid by Sir Andrew Henderson Leith Frazer; Lt. Governor of Bengal on 17th August, 1908, where, the diploma of Licentiate in Agriculture was started initially. The BAU is mandated for teaching, research, extension and training in the fields of agriculture and allied disciplines. It has reached new heights and got 21st rank among Agricultural Universities of the country. It has also received Global Agricultural Leadership Award (2016) from Indian Council of Food and Agriculture, New Delhi. It has already received accreditation by ICAR and has also been awarded with ISO certification. Sabour has been the nerve centre for conducting several important research programmes of national and international standard. The university has 6 colleges and 12 research stations spreaded in 3 agro ecological zones of Bihar. The university also has 20 KVKs under its jurisdiction.

How to Reach BAU, Sabour

The nearest railway stations are Sabour (0.2 km), Bhagalpur Jn (10 km) and Naugachia (25 km) from BAU, Sabour. The nearest airports are Patna and Bagdogra situated at a distance of about 230 and 250 kms, respectively.

About the Department of Molecular Biology & Genetic Engineering

The demand of biotechnology in agriculture and allied areas has led the establishment of the Department of Molecular Biology and Genetic Engineering (MBGE) in 2013 in the premises of BAC, Sabour. The department is mandated to develop suitable molecular tools for complementation of the conventional methods for improving field crops beside significant basic research in Molecular Biology and Biotechnology. The department has well equipped laboratory and smart teaching facility for exposing the graduate and post graduate students to recent and cutting edge advancement in Agricultural Biotechnology.

About the Conference

Biotechnology is one of the important stream that uses live organisms viz. bacteria, viruses, fungi, yeast, animal cells, plant cells etc. to make or modify a product, to improve agricultural crops using molecular tools and techniques for human welfare. This conference aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and results about all biotechnological initiative for agricultural improvement. It also provides the premier interdisciplinary forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Environment and Natural Resources Management.

Theme Area

- Crop Improvement: Conventional and Molecular approaches
- Crop Protection: Challenges & Strategies
- Plant Tissue Culture & Genetic Engineering
- Soil Health Management & Mitigation Strategies
- Bioinformatics & Nanotechnology
- Remote Sensing and Crop Adaption
- Post Harvest Technology
- Animal Biotechnology & Immunology
- Conservation of Genetic Resources, IPR and Biosafety Issues
